

# IEEE NFV-SDN

2022 IEEE Conference on Network Function Virtualization and Software Defined Networks

Chandler, AZ, USA November 14<sup>th</sup> – 16<sup>th</sup>, 2022 #IEEE #NFV #SDN

## CALL FOR DOCTORAL SYMPOSIUM

### Important Dates

Paper submission deadline: ~~Aug. 15<sup>th</sup>~~ **Aug. 29<sup>th</sup>, 2022**

Notification of acceptance: **Sept. 12<sup>th</sup>, 2022**

Camera-ready deadline: **Oct. 9<sup>th</sup>, 2022**

NFV-SDN Conference: **Nov. 14<sup>th</sup>-16<sup>th</sup>, 2022**

### Objectives

The Doctoral Symposium is an innovative feature of the IEEE NFV-SDN conference series. It provides an opportunity for PhD students to discuss and get valuable feedback on their research work from experienced researchers from both industry and academia. It will help to build and strengthen collaboration amongst the communities researching and working in the areas of NFV and SDN.

For PhD students at the beginning of their research, the Doctoral Symposium is a great occasion to expand on the horizon of current research trends and challenges surrounding NFV and SDN technologies. Likewise, the event enables more advanced PhD students to exchange experience with distinguished engineers and scholars and to learn about further career paths or open positions in specialized domains.

The doctoral symposium has the status of an IEEE workshop and provides an excellent opportunity for networking amongst all participants. Accepted submissions are published in the conference proceedings and disseminated through the IEEE Xplore Digital Library.

### Eligibility

The forum is open to all PhD students and researchers whose PhD thesis is in progress, or was recently completed (i.e., during 2021 or 2022). We particularly welcome submissions from PhD students at the beginning of their work when they have a well-defined problem statement and are developing their ideas on how to approach the challenges. Likewise, we are also looking for contributions from PhD students in more advanced stages who want to present their research results and share insights coming from their experience which might help others to progress their work. The Doctoral Symposium Committee will require evidence of the status as a (former) PhD student. This can be a letter from the supervisor or other recognized authority within the university.

### Submission Guidelines

Submitted papers must be written in English and formatted according to the standard IEEE double-column conference template (10-point font). Early stage PhD papers should be two (2) to four (4) pages in length. Late stage PhD papers should be four (4) to six (6) pages in length. One additional page is available for an over length page charge of 100USD. Papers exceeding five (5) pages or seven (7) pages, respectively, are not accepted. For detailed information on submission and advice to best structure the paper, please visit <https://nfvsdn2022.ieee-nfvsdn.org/authors/call-for-doctoral-symposium>.

### Doctoral Symposium Co-Chairs

**Dewang Gedia**, Cisco Systems, USA

**Barbara Martini**, Universitas Mercatorum, IT

**Helge Parzyjgla**, University of Rostock, DE

### NFV-SDN General Co-Chairs

**Larry Horner**, Intel, USA

**Kurt Tutschku**, BTH, SE
